Career Objective:

Frontend Developer is skilled in building scalable web apps like Earnify and EduSphere using React, Next.js, and TypeScript for seamless user experiences.

Skills:

Frontend : JavaScript (ES6+), Typescript, React.js , Next.js, Tailwind CSS

Backend : Node.js, Express.js, Rest APIs

Authentication : NextAuth, OAuth, Firebase, JWT

Database : MongoDB, Mongoose, PostgreSQL

Tools : VS Code, GitHub, GitLab, Vercel, NPM, Postman, Figma

Experience: (February 2025 – July 2025)

Frontend Engineer, [Factoryze](#), Dhaka, Bangladesh. Developed responsive web applications using Next.js and TypeScript, integrating REST APIs and optimizing UI for enhanced performance and user experience.

Projects:

1. Earnify - Micro-Task and Earning Platform :

[Live](#) [Client](#) [Server](#)

The Micro Tasking and Earning Platform allows Workers to earn through tasks, Buyers to manage payments, and Admins to oversee operations with role-based dashboards and secure payments.

- Role-Based Dashboards: Admin, Buyers, Workers
- Manage tasks, earnings, withdrawals, and user activities with real-time tracking
- Real-Time Updates: Instant notification task alerts for timely decisions.

Technologies Used : Tailwind-DaisyUI, React, React Router Dom, Firebase, Express.js , MongoDB, JWT, Axios Interceptors, Framer Motion

2. EduSphere - Education Service-Sharing System :

[Live](#) [Client](#) [Server](#)

EduSphere is a platform connecting users with educational services like tutoring and resource management, offering a secure and efficient experience.

- Secure Authentication.
- Allows users to manage services with real-time database synchronization.
- Real-Time Service Management.

Technologies Used : Tailwind-DaisyUI, React, Firebase ,Express,Mongodb.

3. Planmate - Task Management Application :

[Live](#)

[Client](#)

[Server](#)

A responsive Task Management App with drag-and-drop, real-time updates, and instant database persistence, featuring a clean, minimalistic UI for desktop and mobile users.

- Drag and Drop Tasks: Add,edit,delete and reorder tasks across categories.
- Instant database persistence with seamless frontend-backend synchronization.
- Responsive UI: clean minimalistic design optimized for both desktop and mobile

Technologies Used : Tailwind-DaisyUI, React, Firebase, Express.js, MongoDB.
